**CLAIMS:** The following is a listing of all claims in the application with their status and the text of all active claims:

1. (CANCELLED)
2. (NEW) A weighted swaddling blanket comprising:

a blanket web formed top and bottom surface of flexible material and sandwiching a baby in between, said top and bottom surface coupled at opposite ends by fastening means;

a plurality of compartment means secured to said top surface for receiving pellet material therein to anchor said top surface on top of said baby, each of said compartment means comprising;

a pocket stitching to said top surface, said pocket having an opening only at one end extending across said pocket;

an interior pouch for receiving pellet material tightly sealed secured inside of said pocket;

whereby said baby is positioned and sandwiched between said top and bottom surface of blanket web, said compartment means of said top surface holding and swaddling said baby in place providing a sense of security and comfort and allowing said baby to sleep comfortably, a holding and swaddling effect provides said baby a simulation of secure feeling inside a womb.

3. (NEW) The weighted swaddling blanket of claim 2 wherein the compartment means further comprises said fastening means between the openings of said pocket securing said interior pouch.
